

Exemplary Technology Education Program

Does your school have an outstanding Technology Education Program?
Do you think your program should be recognized throughout the state as an exemplary Technology Education program?
Are you looking for an outside, objective assessment of your Technology Education program?

The Technology Educator's Association of New Jersey is looking to recognize and honor schools and districts that have exemplary Technology Education programs.

Utilizing the document Assessing Technology Education Programs (available through TEANJ), a team of Technology Education professionals will visit and meet with the Technology Education teachers in your school to collaboratively examine the detailed rubrics noted in the document. A written summary will be provided after the visit. Technology Education programs that meet the criteria detailed in the guide or have a plan of action for doing so will be recognized as a 5 Star Exemplary Technology Education Program. "5 Star" programs will be noted in TEANJ publications and media for a period of five years and will receive an award and plaque at the annual TEANJ statewide conference.

The 5 Star Exemplary Technology Education Program is open to all New Jersey schools and districts. Each year, a limited number of citations will be given to exemplary elementary, middle, and high school Technology Education Programs. A fee of \$300 is required at the time of application. This fee is used to cover administration costs and visiting committee member substitute teacher pay.
